## SPECIFICATION SHEET

PRODUCT:	Duck IgY( $\Delta$ Fc) to <b>Human Myoglobin</b>
CATALOG NUMBER	D0304-2B
HOST ANIMAL:	Duck
DESCRIPTION:	IgY ( $\Delta$ Fc ) antibody to human myoglobin is developed in duck by using purified human myoglobin as immunogen. The antibody is purified from duck egg yolk. The product is supplied as a solution in 20mM MES ( 2- ( N-Morpholino ) ethanesulfonic acid ) , pH 5.8, containing 0.1% NaN <sub>3</sub> as a preservative.
IMMUNOGEN:	Purified human myoglobin
CONCENTRATION:	$\geq 10$ mg/ml, determined the absorbance at 280 nm by spectrophotometer and using 1.4 as the extinction coefficient
PURITY:	Determined by SDS-PAGE ( blue stain ) , showing that the IgY( $\Delta$ Fc) constitute was $\geq 80\%$ of total protein; and the total immunoglobulin IgY + IgY( $\Delta$ Fc) constitute was $\geq 90\%$ of total protein.
STORAGE:	For continuous use, store at 0~5°C. For extended storage: -20°C. Repeating freezing and thawing is not recommended.
SPECIFICITY:	A single arc was shown while the antibody was reacting with part-pure human myoglobin by Immuno-electrophoresis. Nothing was shown when the antibody reacted with normal human serum. Similar specific reactions were observed when the antibody was tested by western blot assay.
TITER:	ELISA titer : $\geq 1000x$ ELISA titer is defined as the dilution of antibody ( 1mg/ml ) sufficient to give a change in absorbance of <b>1.0</b> at 450nm. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.
APPLICATIONS:	Good to be used in immunoassay method e.g. Immunoturbidimetry, ELISA, Western blot assay, Immuno-electrophoresis, Immunodiffusion assay <i>et al.</i>
RELATIVE PRODUCTS:	Rabbit antiserum to Human Myoglobin ( <b>R0304-0A</b> )

For *in vitro* research and manufacturing of diagnostic only.
