SPECIFICATION SHEET

PRODUCT:	Duck IgY(Δ Fc) to Insulin
CATALOG NUMBER	D0404-2B
HOST ANIMAL:	Duck
DESCRIPTION:	IgY (Δ Fc) to insulin is developed in duck by using human insulin as immunogen. The antibody is purified from egg yolk. The product is supplied as a solution in 10mM phosphate buffer, 0.14M sodium chloride, pH 7.0, containing 0.02% NaN ₃ as a preservative.
IMMUNOGEN:	Human insulin, recombinant
CONCENTRATION:	≥ 10 mg/ml, The concentration was determined by 280 nm by spectrophotometer, using 1.4 as the extinction coefficient
PURITY:	Determined by SDS-PAGE (blue stain) , showing that the IgY(Δ Fc) constitute was $\geq 80\%$ of total protein, and the total immunoglobulin IgY + IgY(Δ Fc) constitute was $\geq 90\%$ of total protein.
STORAGE:	For continuous use, store at 0~5°C. For extended storage: -20°C. Repeated freezing and thawing is not recommended.
SPECIFICITY:	N.D.
TITER:	ELISA titer : $\geq 100x$ ELISA titer is defined as the dilution of antibody (1mg/ml) sufficient to give a change in absorbance of 1.0 at 450nm. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.
APPLICATIONS:	Good to be used in immunoassay method e.g. Immunoelectrophoresis, Western Blot assay, Immunodiffusion assay, ELISA et al.

RELATIVE PRODUCTS:

For *in vitro* research and the manufacturing of diagnostic only.
