## SPECIFICATION SHEET

PRODUCT:	Duck IgY( $\Delta$ Fc) to <b>Dermatophagoides farinae</b>
CATALOG NUMBER	D1702-2B
HOST ANIMAL	Duck
DESCRIPTION:	IgY( $\Delta$ Fc) to <i>Dermatophagoides farinae</i> is developed in duck by using <i>Dermatophagoides farinae</i> as immunogen. The antibody is purified from egg yolk. The product is supplied as a solution in 20mM MES( 2-( N-Morpholino )ethanesulfonic acid ), pH 5.8, containing 0.1% NaN <sub>3</sub> as a preservative.
IMMUNOGEN:	<i>Dermatophagoides farinae</i>
CONCENTRATION:	$\geq 1.0$ mg/ml, determined by absorbance at 280 nm and using 1.4 as the extinction coefficient
PURITY:	Determined by SDS-PAGE( blue stain ), showing that the IgY( $\Delta$ Fc) constitute was $\geq 80\%$ of total protein, and the total immunoglobulin IgY+IgY( $\Delta$ Fc) constitute was $\geq 90\%$ of total protein.
STORAGE:	For continuous use, store at 0~5°C. For extended storage: -20°C. Repeating freezing and thawing is not recommended.
SPECIFICITY:	N.A.
TITER:	ELISA titer : $\geq 20x$ ELISA titer is defined as the dilution of antibody ( 1mg/ml ) sufficient to give a change in absorbance of <b>1.0</b> at 450nm. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.
APPLICATIONS:	Good to be used in immunoassay method e.g. ELISA, Western Blot assay, Immunoelectrophoresis, Immunodiffusion assay <i>et al.</i>
RELATIVE PRODUCTS:	Duck IgY to Dermatophagoides pteronyssines ( <b>D1701-1B</b> ) Duck IgY to Dermatophagoides pteronyssines—HRP conjugated ( <b>D1701-1I</b> ) Duck IgY( $\Delta$ Fc) to Dermatophagoides pteronyssines ( <b>D1701-2B</b> ) Duck IgY to Dermatophagoides farinae ( <b>D1702-1B</b> )

For *in vitro* research and manufacturing of diagnostic only.
